

# SciCore Summer Elementary Camps 2018

Held at SciCore Academy, High School Campus,  
125 Railroad Ave., Hightstown, NJ

*SciCore Academy is offering a flexible schedule of Elementary academic camps for summer 2018. They are designed to improve your student's reading, writing, math, and science skills through practical exercises, focused assignments, hands-on learning and much individual attention. Hours: 9 am - 3 pm, Monday - Friday. Fees range from \$ 248 to \$335 per week.*

**Adventure Club Grades 4-8 June 25– 29.** This is for all of the hikers and nature lovers out there. Children will be able to unplug from cramped, in-doors activities and discover a passion for the outdoors. Students must be able to walk 2-5 miles and wear sturdy shoes, a hat, and sunscreen. A backpack is recommended to keep their hands free for balance. Among the trails we will visit are: Washington State Forest, Round Valley Recreational Area, Hawk Mountain, Buttermilk Falls, and Bushkill Falls. (\$335)

**Chess for Grades 1 - 8 July 2,3,5,6.** Supervised by our chess teacher, Mrs. Mundayat, who has trained award-winning SciCore chess teams to win in local, state, and international chess competitions. She will tutor your child to reach a greater understanding and mastery of the game. This chess camp will provide your child with unique exercises and many opportunities to play against ability peers. The camp will be divided into different levels to accommodate all levels of chess experience and knowledge. If your child has the chess bug already or would like to learn, this one-week camp will be a great experience. (\$248)

**Elementary Science, Grades 1 – 4 July 9-13** Make a difference in your child's education with this "hands-on" science camp filled with fun and educational experiments guided by an experienced teacher with a degree in chemistry and biology. Experiments are drawn from the areas of biology, chemistry, earth science and elementary physics. Students do their own safe experiments in a laboratory setting and are taught how to write results in a lab notebook. (\$310)

**Elementary Math, Grades 1 - 4 July 16—20.** Taught by master teacher Mrs. Danette Poulos, this math camp will help keep your student's skills strong during the summer, clean up misconceptions, and inspire your children to really enjoy mathematics. (\$310)

**Elementary English, Grades 1-4 July 23—27** Your child will learn to write good sentences and paragraphs, learn the parts of speech, build vocabulary, and read with expression and exact comprehension. See how much your child can learn in just one week! (\$310)

**Early Readers for ages 4-6 July 23—Aug 3 (two weeks).** You won't believe that your child can learn to read in two short weeks. Our proven techniques and caring approach were a genuine hit during the past eight years. Give your child an outstanding gift this summer – the ability to read. (\$620)

**Arts and Crafts Club (All Ages) August 6-10** Give your child a week of fun! Your children will be able to relax at this non-academic camp where they will be able to work on various easy, creative art projects as well as learn about art from different time periods. They will use paint to try and emulate the different styles from these periods and also use other mediums such as paper-mâché, clay, upcycled materials, soap for soap sculpting, and many more fun activities. You will be amazed by your child's artistic abilities. (\$310)

SciCore Academy summer camps will be held at 125 Railroad Ave., Suites 3-5, Old York Commons, Hightstown, NJ
