

# Summer Elementary Camps 2019

Held at SciCore Academy, 125 Railroad Ave.  
Hightstown, NJ

Phone: 609-448-8950 email: atpoulos@scicore.org

*SciCore Academy is offering seven Elementary academic camps during the summer of 2019. They are designed to improve your student's writing, reading, math, and science skills through practical exercises, focused assignments, and much individual attention. Four hours of academics, one and a half hours of art, music or games, 9 am - 3 pm, Mon. - Fri. Fees: typically \$310 per week; \$250 for Chess; and, \$350 per week for Adventure Camp.*

**Adventure Camp, Grades 4-8 June 24—July 5** This is for all of the hikers and nature lovers out there. Children will be able to unplug from cramped, in-doors activities and discover a passion for the outdoors. Students must be able to walk 2-5 miles and wear sturdy shoes, a hat, and sunscreen. A backpack is recommended to keep their hands free for balance. Transportation to the hiking sites will be provided. (\$350/week)

**Chess, Grades 1-8 July 1, 2, 3, 5.** Supervised by award-winning master chess tutor, Sindhu Mundayat, this camp will provide your child with unique exercises and much opportunity to play against ability peers. If your child has the chess bug already or would like to learn, this camp will be a great experience. (\$250)

**Elementary Science, Grades 1-4 July 8 - 12.** Make a difference in your student's education with this "hands-on" science camp filled with fun and educational experiments guided by a professional scientist. Experiments are drawn from biology, chemistry, earth science, and elementary physics. Students actually do their own experiments! (\$310)

**Elementary Math, Grades 1-4 July 15- 19.** Supervised and taught by master teacher Mrs. Danette Poulos. This math camp will help keep your student's skills strong during the summer, clean up misconceptions, and inspire your children to really enjoy mathematics. The course will begin with a diagnostic test to determine your child's level and needs. The class will then be divided into groups to optimize the instruction path. By the end of the camp, your child will be far more confident in their math capabilities and will feel more prepared for their upcoming school year. (\$310)

**Elementary English, Grades 1-4 July 22 - 26.** Our elementary English camp will be taught by Mrs. Danette Poulos, a master teacher who has helped many students over the past 10 years gain a passion for writing and increased proficiency in all areas of English. Your child will learn to write good sentences and paragraphs, learn the parts of speech, build their vocabulary, and read with expression and exact comprehension. Students should bring a bound subject notebook and at least one number two pencil. See how much your child can accomplish in one short week! (\$310)

**Early Readers, Ages 4-6, July 29 - August 9.** You won't believe that your child can learn to read in three short weeks. Our proven techniques and caring approach were a genuine hit during the past three years. Give your child an outstanding gift this summer — the ability to read. (\$310/week)

**Arts and Crafts, Ages 7 - 12, August 5 - 9.** Give your child a week of fun! Your children will be able to relax at this non-academic camp where they will be able to work on various easy, creative projects as well as learn about art from different time periods. They will use paint to try and emulate the different styles from these periods and also use other mediums such as clay, recycled materials, soap for soap sculpting, and many more fun activities. You will be amazed by your child's artistic abilities! (\$310)

SciCore Academy summer camps will be held at 125 Railroad Ave., Suites 3-5, Old York  
Commons, Hightstown, NJ
